

# CLEAN ENERGY IN WISCONSIN

## WISCONSIN PRIORITIZES CLEAN ENERGY PROJECTS

**WE BELIEVE IN SUSTAINABILITY SO MUCH, WE STARTED A HOLIDAY FOR IT: EARTH DAY.**

Now observed by billions of people, Earth Day started in Wisconsin in 1970 and we remain committed to clean energy today.

### **Wisconsin Green Innovation Fund**

This initiative will help fund the deployment of renewable energy projects across the state. WEDC adds value by aligning business objectives with sustainability goals.

### **State Office of Sustainability & Clean Energy**

We have programs and policies that support your company's use of clean energy resources and technology, to help address climate change.

**Focus on Energy Program** We provide information, resources, and financial incentives to help your company implement energy efficiency and renewable projects.

### **Energy Innovation Grant Program (EIGP)**

Your company can access funding for a wide variety of projects that reduce energy consumption and support renewable energy vehicles and infrastructure.

### **Research Tax Credits**

Your company can be reimbursed for research activities related to certain energy-efficient products.

### **Wisconsin Electric Vehicle Infrastructure Plan**

Wisconsin has 730 publicly accessible charging locations with 1,763 charging ports for electric vehicles. The state Department of Transportation is facilitating collaboration among government, industry, and the public to further develop this infrastructure.

### **Wisconsin DNR's Green Tier Program**

If your organization is exploring a path to sustainability, we have a systematic approach to minimize environmental risk. We add value by helping align business objectives with environmental stewardship.

### **Property Assessed Clean Energy (PACE)**

We'll help your company obtain low-cost, long-term loans for energy efficiency, renewable energy, and water conservation improvements on your property.
